DESCRIPCIÓN GENERAL DEL SEGMENTO 3B-1

PAQUETE 1: MEJORAS DE DRENAJE A LO LARGO DE ST. EMANUEL STREET HASTA BUFFALO BAYOU (3B-1)

- Construcción de un desagüe pluvial hacia Buffalo Bayou (incluye cajones pluviales y un estanque de retención), y reconstrucción de St. Emanuel St.
- Contrato Adjudicado en junio de 2024
  - Costo del Proyecto: $121.8 Millones
  - Contratista: Harper Brothers Construction
  - La construcción comenzó en octubre de 2024
  - Finalización prevista en 2027
- Participación activa del público, la cual continuará hasta la finalización de la construcción

CONSTRUCCIÓN DEL SEGMENTO 3B-1

Las cuadrillas colocan paneles metálicos de contención en el área donde se construirá un gran estanque de retención a lo largo de Runnels Street, cerca de la I-69. Estos paneles metálicos de contención darán soporte al estanque una vez que esté terminado.

Los trabajadores utilizan excavadoras para excavar en el terreno del área donde se construirá el gran estanque de retención a lo largo de Runnels Street, cerca de la I-69. El sistema de drenaje mejorado a lo largo de St. Emanuel Street captará el agua de lluvia y la llevará al estanque de retención, donde será almacenada y posteriormente drenada de forma gradual hacia Buffalo Bayou.
