ABOUT ICMS

Integrated CM Solutions or ICMS is an African American, Woman Owned, DBE certified firm headquartered in San Antonio, TX with offices in Dallas, Austin and Shreveport, LA. Operating principally as a Program/Construction Management firm, our professional staff provides Project Management, Construction Management, Construction Inspection, Scheduling, Document Control, Project Control and Cost Estimating services to State and Local governmental agencies across the state of Texas and Louisiana.

Our services are utilized in projects ranging from heavy highway, roadway, bridges, airports (land and airside), hospitals, educational facilities, water/wastewater and transit. At ICMS we pride ourselves on quality and responsiveness. Our professional and pragmatic staff of both veteran CM professionals as well as young, upcoming PM professionals offers our clients the best of both seasoned experience coupled with a fresh prospective on Project Management that supports bringing their projects in on time, on budget and with the upmost of quality at all aspects of the project.

ICMS is paired with WSP in the TxDOT DRIVE Program. As a mentor/protégé team, we have covered topics ranging from operations, TxDOT precertification, pipeline creation for project pursuits, marketing and business development, invoicing and other relative topics that support small business capacity building. The DRIVE program has opened an opportunity for both firms to learn from one another and forge a longstanding relationship that we are hopeful, leads to a successful and prosperous teaming relationship in the future. ICMS is grateful for the opportunity to learn the inner workings of WSP and what makes them such a dynamic leader in the industry.

Through the TxDOT DRIVE Program, WSP is building a relationship with ICMS which includes working together to identify key teaming opportunities on project pursuits, as well as discussing tools and techniques for client engagement and how to build a pipeline of future opportunities. We look forward to the opportunity to collaborate with ICMS on upcoming pursuits to progress our partnership through successful project delivery. WSP has enjoyed working with ICMS as part of the DRIVE program and we look forward to continuing our partnership in the coming months!
