

Summary of Chapter 7 Proposed Changes

The Texas Department of Transportation proposes amendments to §7.35, Hazardous Materials - Written Reports, to provide that the rules are consistent with railroad industry best practices for reporting information about the shipping of hazardous material by rail within the state and to improve the compliance with safety regulations. Amendments to §7.36, Clearances of Structures Over and Alongside Railway Tracks, are being made to change the process used by the department for granting applications to deviate from railway clearance requirements.
