

DISTRICT PROFILE

The Wichita Falls District plans, designs, builds, operates, and maintains the state transportation system in nine counties. The district primarily conducts asset preservation, which results in varying challenges for maintenance crews and designers to maintain mobility and ensure the traveling public's safety. The Wichita Falls District experiences varying weather conditions from extreme heat to sub-freezing temperatures. Blizzards, tornadoes, flooding, and wildfires are common in the region.

MAINTENANCE: Fully loaded semis transporting cargo as well as support for the wind, oil, and gas energy sectors keep maintenance personnel busy and led our employees to design a nationally recognized hot mix pavement that can handle the beating. In fiscal year 2024, we spent \$11.04 million on seal coat projects for preventative maintenance. \$595.2 million paid for pavement repair, overlay jobs, and widenings. Our total construction letting was \$626.3 million.

CORRIDORS: The Wichita Falls District has two interstates running through it into Oklahoma and points north. I-44 and I-35 are the two busiest travel highways for the region. However, US 287 carries the third-highest traffic volume for the Wichita Falls District.

SAFETY: Our engineers are challenged to design safer highways with wider lanes and shoulders to handle the mix of traffic. We utilize rumble strips as a lane departure warning system and employ cable barriers to protect motorists from head-on collisions. Maintenance employees are skilled at battling snow and ice as well as rushing flood waters that not only take a toll on our roads and bridges but also endanger motorists.
