Limits: From: SH 20 (Mesa St.) To: US 54

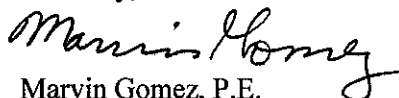

Dear Ms. Castner:

The Texas Department of Transportation is preparing the Preliminary Engineering Report (PER) and Draft Environmental Impact Statement (DEIS) for the Border Highway West Extension Project consisting of a 15.2-mile long limited access highway in the City of El Paso, Texas. The study corridor is generally bounded on the north by Interstate 10 (I-10), on the south by the Rio Grande River, on the east by Fonseca Drive and on the west by Mesa Street. The study corridor is shown on the attached map.

Our firm has been assigned the task of gathering utility information and preparing a constraints map for the study corridor, and therefore, we would like to request your assistance in providing any available record drawings (preferably compatible with ArcView, AutoCAD, and/or MicroStation Computer Software) or hard copies of your facilities from the **El Paso Water Utilities** in the study corridor. The information you provide will be compiled in a base map and used to evaluate the constraints and opportunities by alternative routes and identify a preferred alternative for the Border Highway West Extension Project. We anticipate holding a number of coordinating meetings with entities such as yours to identify the significant issues that should be addressed in this preliminary engineering design phase of the project.

We would appreciate your response in writing, to our office, no later than June 30, 2010. In the meantime, if you have any questions regarding this letter, please contact me at (915) 532-2091, Ext. 19 or by email at mgomez@morenocardenas.com. Thank you for your consideration, and any cooperation you can give us regarding these matters.

Sincerely,

Marvin Gomez, P.E.

Kinder Morgan Energy
6850 Market St.
El Paso, TX 79915

Attention: Gary Miller

Reference: Border Highway West Extension Project
Subject: Preliminary Design Utility Coordination
County: El Paso
Control: 2552-04-027
Highway: LP 375
Limits: From: SH 20 (Mesa St.) To: US 54

Dear Mr. Miller:

The Texas Department of Transportation is preparing the Preliminary Engineering Report (PER) and Draft Environmental Impact Statement (DEIS) for the Border Highway West Extension Project consisting of a 15.2-mile long limited access highway in the City of El Paso, Texas. The study corridor is generally bounded on the north by Interstate 10 (I-10), on the south by the Rio Grande River, on the east by Fonseca Drive and on the west by Mesa Street. The study corridor is shown on the attached map.

Our firm has been assigned the task of gathering utility information and preparing a constraints map for the study corridor, and therefore, we would like to request your assistance in providing any available record drawings (preferably compatible with ArcView, AutoCAD, and/or MicroStation Computer Software) or hard copies of your facilities from the **Kinder Morgan Energy** in the study corridor. The information you provide will be compiled in a base map and used to evaluate the constraints and opportunities by alternative routes and identify a preferred alternative for the Border Highway West Extension Project. We anticipate holding a number of coordinating meetings with entities such as yours to identify the significant issues that should be addressed in this preliminary engineering design phase of the project.

We would appreciate your response in writing, to our office, no later than June 30, 2010. In the meantime, if you have any questions regarding this letter, please contact me at (915) 532-2091, Ext. 19 or by email at mgomez@morenocardenas.com. Thank you for your consideration, and any cooperation you can give us regarding these matters.

Sincerely,

Marvin Gomez, P.E.
Project Manager

Dear Ms. Abeita:

The Texas Department of Transportation is preparing the Preliminary Engineering Report (PER) and Draft Environmental Impact Statement (DEIS) for the Border Highway West Extension Project consisting of a 15.2-mile long limited access highway in the City of El Paso, Texas. The study corridor is generally bounded on the north by Interstate 10 (I-10), on the south by the Rio Grande River, on the east by Fonseca Drive and on the west by Mesa Street. The study corridor is shown on the attached map.

Our firm has been assigned the task of gathering utility information and preparing a constraints map for the study corridor, and therefore, we would like to request your assistance in providing any available record drawings (preferably compatible with ArcView, AutoCAD, and/or MicroStation Computer Software) or hard copies of your facilities from the **Verizon Wireless** in the study corridor. The information you provide will be compiled in a base map and used to evaluate the constraints and opportunities by alternative routes and identify a preferred alternative for the Border Highway West Extension Project. We anticipate holding a number of coordinating meetings with entities such as yours to identify the significant issues that should be addressed in this preliminary engineering design phase of the project.

We would appreciate your response in writing, to our office, no later than June 30, 2010. In the meantime, if you have any questions regarding this letter, please contact me at (915) 532-2091, Ext. 19 or by email at mgomez@morenocardenas.com. Thank you for your consideration, and any cooperation you can give us regarding these matters.

Sincerely,

Marvin Gomez, P.E.

The study corridor is generally bounded on the north by Interstate 10 (I-10), on the south by the Rio Grande River, on the east by Fonseca Drive and on the west by Mesa Street. The study corridor is shown on the attached map.

Our firm has been assigned the task of gathering utility information and preparing a constraints map for the study corridor, and therefore, we would like to request your assistance in providing any available record drawings (preferably compatible with ArcView, AutoCAD, and/or MicroStation Computer Software) or hard copies of your facilities from the **Navajo Refining Co.** in the study corridor. The information you provide will be compiled in a base map and used to evaluate the constraints and opportunities by alternative routes and identify a preferred alternative for the Border Highway West Extension Project. We anticipate holding a number of coordinating meetings with entities such as yours to identify the significant issues that should be addressed in this preliminary engineering design phase of the project.

We would appreciate your response in writing, to our office, no later than June 30, 2010. In the meantime, if you have any questions regarding this letter, please contact me at (915) 532-2091, Ext. 19 or by email at mgomez@morenocardenas.com. Thank you for your consideration, and any cooperation you can give us regarding these matters.

Sincerely,

Marvin Gomez, P.E.
Project Manager

Dear Mr. Vigil:

The Texas Department of Transportation is preparing the Preliminary Engineering Report (PER) and Draft Environmental Impact Statement (DEIS) for the Border Highway West Extension Project consisting of a 15.2-mile long limited access highway in the City of El Paso, Texas. The study corridor is generally bounded on the north by Interstate 10 (I-10), on the south by the Rio Grande River, on the east by Fonseca Drive and on the west by Mesa Street. The study corridor is shown on the attached map.

Our firm has been assigned the task of gathering utility information and preparing a constraints map for the study corridor, and therefore, we would like to request your assistance in providing any available record drawings (preferably compatible with ArcView, AutoCAD, and/or MicroStation Computer Software) or hard copies of your facilities from the **El Paso Electric Co.** in the study corridor.
