Material Producer List  
Materials and Tests Division

*Texas Department of Transportation*

## **Paints (Structural, High Corrosion Environment)**

The following manufacturers of structural paint have complied with the requirements of either DMS-8100, "Structural Steel Paints-Formula," DMS-8101 "Structural Steel Paints – Formula," DMS-8102 "Paint systems for Galvanized Steel," or DMS-8104 "Paint, Shop Application for Steel Bridge Members."

The materials listed below are pre-qualified for use when the respective DMS is referenced. These materials require no further testing before use unless deemed necessary by the Project Engineer or the Materials and Tests Division (MTD). Tex-736-I, "Sampling Structural Coatings," describes the sampling method.

The Department reserves the right to conduct random sampling of pre-qualified, certified materials for testing and to perform random audits of test reports. Department representatives may sample material from the manufacturing plant, the project site, and the warehouse. MTD reserves the right to test samples to verify compliance with the corresponding DMS.

For qualification on the MPL contact [DMS\\_Prequal@txdot.gov](mailto:DMS_Prequal@txdot.gov) following the pre-qualification procedure of the respective DMS. For additional information, contact the MTD's Coatings, Calibration and Traffic Materials Section at (512)-221-4998.
