Commercial Fishing

Other

The Chambers-Liberty Counties Navigation District, established in 1944, is the sole owner of the Port of Anahuac. The District is 470,000 acres in size and stretches from the northern boundary of Liberty County to the southern boundary of Chambers County. The District now performs two major functions: navigation and raw water supply to the municipalities and agricultural producers.

Port Priorities & Opportunities

The district includes five shallow draft navigation channels:

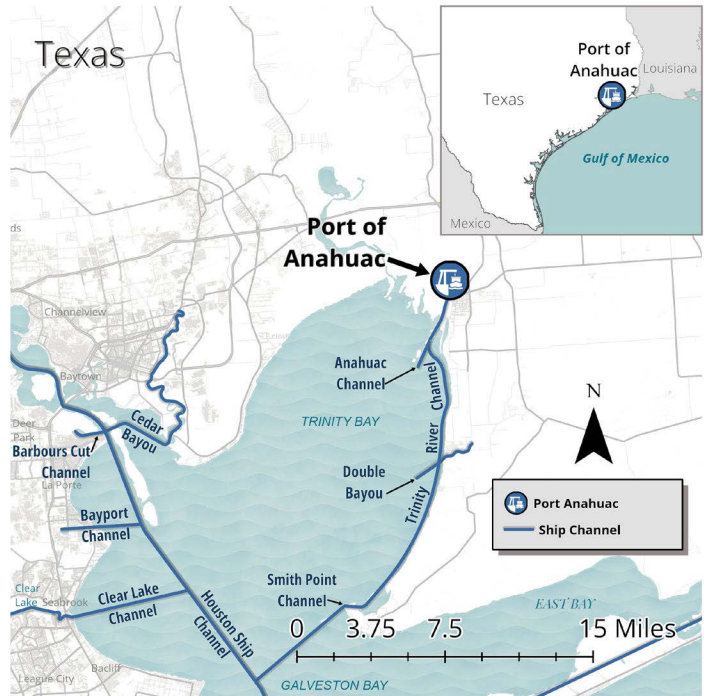

- Anahuac Channel
- Cedar Bayou Channel
- Double Bayou Channel
- Smith Point Channel
- Trinity River Channel to Liberty, TX

The most used channels for the district include Cedar Bayou Channel, which services the chemical and aggregate industries, Double Bayou Channel, which services the offshore marine and commercial fishing industries, and Smith Point Channel, which services commercial fishing and marine maintenance facilities. The district's channels are also highly utilized for sport fishing and recreational fishing and boating. The district continues to expand and develop additional marine facilities to promote ecotourism and commercial marine economic development. There is no active vessel traffic into and out of the port at this time.

Port Projects

Project Name	Project Type	Total Project Cost
Double Bayou Channel Improvement	Ship Channel	\$6.0 Million

Cost provided by port/navigation district
