

DMS-7400: Laboratories Approved to Perform Compaction and Triaxial Compression Testing

Material Producer List

Materials and Tests Division (MTD)

Laboratories Approved to Perform Compaction and Triaxial Compression Testing

Overview

The Geotechnical, Soils, and Aggregates Section of the Materials and Tests Division (MTD) maintains a program to qualify commercial laboratories to conduct compaction and triaxial compression testing of soils and base materials. A commercial laboratory is defined as a laboratory that performs testing for contractors, material suppliers, the Department, or any company performing work associated with a Department project. Laboratories approved under this program can:

- conduct compaction and triaxial compression testing of soils and base materials for the Department and
- conduct compaction and triaxial compression testing of soils and base materials for contractors and suppliers to use as a basis of request for referee testing by MTD.

The following commercial laboratories have met the requirements of DMS-7400, “Qualification Procedure for Laboratories Conducting Compaction and Triaxial Compression Testing of Soils and Base Materials,” and are approved to perform Tex-113-E and Tex-117-E. If you have questions concerning this list, please call (512) 506-5903.

Effective Date: **August 11, 2022**
