

# Laboratories Approved to Perform Compaction and Triaxial Compression Testing

---

## Material Producer List

Materials and Tests Division (MTD)

## Laboratories Approved to Perform Compaction and Triaxial Compression Testing

### Overview

The Geotechnical, Soils, and Aggregates Section of the Materials and Tests Division (MTD) maintains a program to qualify commercial laboratories to conduct compaction and triaxial compression testing of soils and base materials. A commercial laboratory is defined as a laboratory that performs testing for contractors, material suppliers, the Department, or any company performing work associated with a Department project. Laboratories approved under this program can:

- conduct compaction and triaxial compression testing of soils and base materials for the Department and
- conduct compaction and triaxial compression testing of soils and base materials for contractors and suppliers to use as a basis of request for referee testing by MTD.

The following commercial laboratories have met the requirements of DMS-7400, “Qualification Procedure for Laboratories Conducting Compaction and Triaxial Compression Testing of Soils and Base Materials,” and are approved to perform Tex-113-E and Tex-117-E. If you have questions concerning this list, please call (512) 506-5907.

**Effective Date: November 14, 2018**

**Laboratories Approved to Perform Compaction and Triaxial Compression Testing**

Commercial Laboratory	Address	Contact Person	Phone Number	E-mail
Alliance Geotechnical Group	3228 Halifax Street Dallas, TX 75247	Perry Kakara, S.E.T. Matt Moody, S.E.T.	972-603-5432 972-342-9244	<a href="mailto:PKakara@aggeng.com">PKakara@aggeng.com</a> <a href="mailto:MMoody@aggengr.com">MMoody@aggengr.com</a>
