Concrete Curing Compounds (Liquid Membrane-Forming)

The following sources are qualified in accordance with DMS-4650, "Hydraulic Cement Concrete Curing Materials and Evaporation Retardants."

The materials listed below are pre-qualified for use when DMS-4650 is referenced. These materials require no further testing before use unless indicated "By Batch" in the "Expiration Date" column in the producer table below or deemed necessary by the Project Engineer or the Materials and Tests Division (MTD). Tex-718-I, "Sampling Liquid Membrane-Forming Compounds for Curing Concrete," describes the sampling method.

The Department reserves the right to conduct random sampling of pre-qualified, certified materials for testing and to perform random audits of test reports. Department representatives may sample material from the manufacturing plant, the project site, and the warehouse. MTD reserves the right to test samples to verify compliance with DMS-4650.

For qualification on the MPL contact DMS_Prequal@txdot.gov following the pre-qualification procedure of DMS-4650. For additional information, contact the MTD's Coatings, Calibration and Traffic Materials Branch at (512)-221-4998.
